

**There is hope and
recovery from
Opioid Use Disorder...**

Idaho's Response to the Opioid Crisis (IROC) sub-grant is to promote the national best practice of connecting individuals seeking recovery from opioid addiction with Recovery Coaches who assist them during the beginning stages of recovery and throughout their journey.

Idaho's Response to the Opioid Crisis (IROC)

This project is working to fight the opioid epidemic currently plaguing Idahoans, their family members and friends. The Division of Behavioral Health (DBH) is currently using a multifaceted approach that seeks to expand access to Medication-Assisted Treatment (MAT), reduce access to opioids through prevention efforts, enhance the recovery-oriented system of care, and reduce deaths.

Recovery can be a struggle, but your life is worth it... Recovery is real.

"When I first started taking prescription pills, I didn't think I had a problem. I thought it was fine. My identity shifted when I got into recovery. That's who I am now" "

~ Stay-a-Home Mother

"In recovery, I am now a present father to my two little girls and my wife. With help, I found hope."

~ Father In Long-Term Recovery

Opioid Use Disorders

- OUD includes addiction to prescription opioids as well as illicit drugs such as heroin.

IROC is funded through the State Targeted Response to the Opioid Crisis Grant awarded to the Division of Behavioral Health (DBH) by the Substance Abuse and Mental Health Services Administration (SAMHSA)

This grant program aims to address the opioid crisis by increasing access to treatment, reducing unmet treatment need, and reducing opioid overdose-related deaths through the provision of prevention, treatment, and recovery activities for Opioid Use Disorders.
